## SUMMARY

First-year B.Tech CSE student at SRM University-AP with a 9.63 GPA and hands-on experience building full-stack web applications, machine learning systems, and database-driven platforms. Passionate about solving real-world problems through software and actively seeking internship opportunities in software development or data engineering.

## EDUCATION

**SRM University-AP**  
Amaravati, India

**B.Tech. Computer Science and Engineering**  
Aug 2024 – Present

- Cumulative GPA: **9.63 / 10** (Till 3rd Semester) | **Dean's List Awardee** (April 2026)
- Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming, Computer Networks, Discrete Mathematics

## PROJECTS

### Eco-Vivah AI

[\[GitHub\]](#)

- Built an AI-powered sustainable Indian wedding planning platform with ML-based food quantity prediction and vendor cost optimization, cutting estimated carbon output by targeting zero-waste catering.
- Trained a Random Forest model (scikit-learn) for guest-wise food predictions; used PuLP for linear-programming vendor selection; integrated Gemini API for natural language recommendations.
- Tech: Python, FastAPI, scikit-learn, PuLP, Google Gemini API, React 18, Vite, Tailwind CSS, SQLite, Firebase Auth*

### Darshan Ease

[\[GitHub\]](#)

- Developed a digital temple management system enabling devotees to pre-book darshan time slots, reducing on-site wait times and overcrowding.
- Implemented JWT authentication and an admin dashboard for real-time visitor capacity monitoring and crowd control.
- Tech: React, Node.js, Express.js, MongoDB, JWT*

### Clg-Bzr (The College Bazaar)

[\[GitHub\]](#)

- Built a campus-based C2C marketplace for students to buy, sell, or rent items, reducing informal transaction friction across the student community.
- Implemented a Beacon system coordinating groups of up to 4 users (host + 3 peers) with real-time state sync via Firebase.
- Tech: React, Firebase (Firestore, Auth, Realtime Database)*

### JoinIn

[\[GitHub\]](#)

- Designed a “just-in-time” activity partner platform where students broadcast temporary Beacons for impromptu plans, significantly lowering social friction for peer-to-peer meetups.
- Built localized discovery feature enabling nearby peers to instantly find and join ongoing activities with a single tap.
- Tech: React, Node.js, Express.js, MongoDB*

### Hospital Management System

[\[GitHub\]](#)

- Designed a normalized relational database architecture covering patient records, doctor scheduling, billing, appointments, and emergency contacts with full ER diagram documentation.
- Implemented role-based data access patterns to enforce privacy between patient, doctor, and admin roles.
- Tech: SQL, MySQL, ER Modeling (DBMS course project)*

### UniTrack Pro

[\[GitHub\]](#)

- Developed a university ERP system to streamline administrative and academic management tasks across departments.
- Engineered a role-based access control (RBAC) system to securely isolate user privileges and data across student, faculty, and admin roles.
- Tech: Python, SQL, REST APIs*

Stack Visualizer

[\[GitHub\]](#)

- Built an interactive web tool demonstrating LIFO stack operations with step-by-step animations, undo/redo support, and a notification history panel.
- *Tech: HTML, CSS, JavaScript (Vanilla)*

ACHIEVEMENTS & HACKATHONS

- **Dean’s List Certificate:** Awarded for outstanding academic performance (GPA 9.63) at SRM University-AP (April 2026).
- **Hack MSC 2.0:** Participated and built a working prototype within a 24-hour hackathon sprint (Nov 1–2, 2025).
- **Code For Connection (CFC):** Participated in a social-impact focused hackathon (Feb 14, 2026).
- **Amaravathi Quantum Valley Hackathon (AQVH):** Participated in a technology and innovation hackathon (Aug 28, 2025).

SKILLS

|                    |                                                            |
|--------------------|------------------------------------------------------------|
| Languages:         | C, C++, Python, JavaScript, HTML, CSS, SQL                 |
| Frontend:          | React 18, Vite, Tailwind CSS, Recharts                     |
| Backend & APIs:    | Node.js, Express.js, FastAPI, REST APIs, JWT               |
| Databases:         | MongoDB, Firebase (Firestore / Realtime DB), SQLite, MySQL |
| ML / Data Science: | scikit-learn (Random Forest), PuLP (Linear Programming)    |
| Tools & Platforms: | Git, GitHub, Firebase Auth, Google Gemini API              |
| Soft Skills:       | Team Leadership, Adaptability, Persistence                 |
