EDUCATION

SRM University-AP

Amaravati, India

B.Tech. Computer Science and Engineering

Aug 2024 – Present

- GPA: **9.63 / 10** (Till 4th Semester) | Dean's List Awardee (April 2026)
- **Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks

EXPERIENCE

APSCHE SMARTBRIDGE

Remote

Google Cloud Generative AI Intern

2026 – Present

- Developed and tested advanced prompt engineering strategies, including zero-shot and few-shot prompting, to control output formatting, accuracy, and consistency across tasks.
- Implemented Retrieval-Augmented Generation (RAG) workflows utilizing dense vectors and embeddings to ground Large Language Model (LLM) responses in specific data sources.
- Designed Responsible AI evaluation criteria to enforce safety controls, reduce bias, and structure hands-on prompts for extracting defined data formats like JSON.

PROJECTS

Eco-Vivah AI

[\[GitHub\]](#)

- AI-powered sustainable Indian wedding planner with Random Forest food-quantity prediction (scikit-learn), PuLP vendor optimization, and Gemini API recommendations.
- Tech: *Python, FastAPI, scikit-learn, PuLP, Gemini API, React 18, Tailwind CSS, SQLite*

Darshan Ease

[\[GitHub\]](#)

- Digital temple management system for pre-booking darshan slots, cutting on-site wait times; features JWT auth and real-time admin crowd-control dashboard.
- Tech: *React, Node.js, Express.js, MongoDB, JWT*

URL Shortener

[\[GitHub\]](#)

- Developed a full-stack URL shortener using Node.js, Express.js, and MongoDB Atlas to manage link generation, redirection, and click tracking.
- Implemented REST API endpoints for URL management and integrated nanoid for collision-resistant unique identifier generation.
- Engineered backend logic for duplicate URL detection and deployed the application via Render with secure environment variable configuration.
- Tech: *Node.js, Express.js, MongoDB, JavaScript, HTML, CSS*

JoinIn

[\[GitHub\]](#)

- Just-in-time activity partner app - students broadcast temporary Beacons for impromptu plans; localized discovery lets nearby peers join in one tap.
- Tech: *React, Node.js, Express.js, MongoDB*

Hospital Management System

[\[GitHub\]](#)

- Normalized relational DB covering patients, doctors, billing, appointments, and emergency contacts with full ER diagrams and role-based access patterns.
- Tech: *SQL, MySQL (DBMS course project)*

ACHIEVEMENTS & HACKATHONS

- **Dean's List Certificate:** Awarded for outstanding academic performance (SGPA 10.0 in 3rd Semester), SRM University-AP (April 2026).
- **Hack MSC 2.0** (Nov 2025) | **Code For Connection** (Feb 2026) | **AQVH** (Aug 2025) – hackathon participant across three events.

SKILLS

Languages:	C, C++, Python, JavaScript, HTML, CSS, SQL
Frontend:	React 18, Vite, Tailwind CSS, Recharts
Backend & APIs:	Node.js, Express.js, FastAPI, REST APIs, JWT
Databases:	MongoDB, Firebase (Firestore/Realtime DB), SQLite, MySQL
ML / Data:	scikit-learn (Random Forest), PuLP, LLMs, RAG, Prompt Engineering
Tools:	Git, GitHub, Vertex AI, Google Gemini API, Firebase Auth
